

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Annual Report, 1885, one volume text and one volume atlas, contains:

1. Oil and Gas.
2. Vegetable Origin of Coal.

3. Pittsburgh Coal Region.
4. Wellsburg Coal basin.
5. Tipton Run Coal Basin.
6. Anthracite Coal Region.
7. Wyoming County Fossils.
8. Bernice Coal Basin.
9. Mehoopany Coal Field.
10. Cornwall Ore mines.
11. Delaware and Chester Kaolins.
12. Quarternary Geology, Wyoming Valley.
13. Pressure, etc., of Rock Gas.
14. Progress Geodetic Survey.

Annual Report, 1886, four volumes text and two volumes atlas, contains:

- i. Pittsburgh Coal Region.
- ii. Oil and Gas Regions.
- iii. Anthracite Coal Region with atlas.
- iv. 1. The Lehigh River Cross Section.
2. Paint Ores along the Lehigh River.
3. Iron Ore Mines and Limestone Quarries of the Cumberland-Lebanon Valley.
4. Geology of Radnor Township, Delaware County, with an atlas.

Annual Report, 1887, one volume with maps, contains:

1. Cave Fossils.
2. Fossil Tracks in the Trias.
3. New Boston Anthracite Basin.
4. State Line Serpentine.

Grand Atlases.

These atlases contain maps and sections printed on heavy paper (sheets 26 inches by 32 inches) of similar maps and sections printed on light paper sheets contained in the octavo atlases.

Division I, Part 1, Geological maps of 56 counties.

Division II, Part 1, Anthracite Coal Fields.

Division II, Part 2, Anthracite Coal Fields.

Division III, Part 1, Petroleum and Bituminous Coal Fields.

Division IV, Part 1, Durham and Reading Hills and South Mountains.

Division V, Part 1, Central and Southeastern Pennsylvania.

Appendix to Grand Atlas, edition in rolls, containing three sheets of South Mountain topography, a geological map of Berks county and of Huntingdon county.

Summary Final Report, Geology of Pennsylvania, Vol. I, describing Laurentian, Hunronian, Cambrian and Lower Silurian formations and their sub-divisions.

Summary Final Report, Geology of Pennsylvania, Vol. II, describing Upper Silurian and Devonian formations and sub-divisions.

Summary, Final Report, Geology of Pennsylvania, Vol. III, two parts:

Part I. Carboniferous rocks and Anthracite report.

Part II. Bituminous Coal Fields and New Red of Bucks and Montgomery Counties.

Atlas to Final Summary Report, contains a new geological map of the State, scale 6 miles to 1 inch; map of the Bituminous coal district, scale 4 miles to 1 inch.

Geological map of Lebanon county, geological and topographical maps and a section of Bucks and Montgomery Counties.

A BRIEF GUIDE TO THE PUBLICATIONS OF THE PENNSYLVANIA GEOLOGICAL SURVEY.

1874-1891.
